Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Previously Presented) A system for controlling product items with shelf-life limitations comprising:
means for determining shelf-life limitation information for each of one or more product items;
means for recording said shelf-life limitation information for each of said one or more product items;
means for reading said recorded shelf-life limitation information for a product item selected for purchase;
an electronic receipt electronically storing the read shelf-life limitation information for the selected product item, the electronic receipt being provided to a purchaser of the product item;
means for retrieving the shelf-life limitation information from the electronic receipt; and
a processor coupled to the means for retrieving, the processor adding the retrieved shelf-life limitation information to an inventory list of products purchased by the purchaser, the processor further detecting an expired product based on the shelf-life limitation information, and removing the expired product from the inventory list.

2. (Cancelled)

3. (Original) The system of claim 1, further comprising:
means for storing said communicated electronic shelf-life
limitation information for each of said one or more product
items in a memory accessible by said microprocessor.

4. (Original) The system of claim 3, further comprising:
means for formatting for an on-screen display said stored
electronic shelf-life limitation information for each of said
one or more product items.

5. (Original) The system of claim 4, further comprising:
means for displaying as an on-screen display said formatted
electronic shelf-life limitation information for each of said
one or more product items.

6. (Original) The system of claim 5, further comprising:
means for the purchaser to interact with said onscreen
display of said formatted electronic shelf-life limitation
information for each of said one or more product items to
identify new product items.

7. (Original) The system of claim 6, further comprising:
means for said purchaser to interact with said on-screen
display of said formatted electronic shelf-life limitation
information for each of said one or more product items to
identify deleted product items.

LAL PAS593748.1--01/28/05 2:19 PM

8. (Original) The system of claim 7, further comprising:
means for said purchaser to interact with said on-screen display of said formatted electronic shelf-life limitation information for each of said one or more product items to identify opened product items.

9. (Previously Presented) The system of claim 1 where the means for reading said recorded shelf-life limitation information for each of said one or more product items further comprises;

means for converting said read shelf-life limitation information for each of said one or more product items to an electronically readable and storable form.

10-33 (Cancelled)

34. (Previously Presented) The system of claim 1, wherein the shelf-life limitation information includes a period for which the product remains viable.

35. (Previously Presented) A system for controlling product items with shelf-life limitations comprising:

a data store storing shelf-life limitation information for a product item;

a scanner scanning a product indicia associated with the product item;

a first terminal coupled to the scanner, the first terminal receiving the scanned product indicia and searching the data

store for the associated shelf-life limitation information, the first terminal further generating an electronic receipt electronically storing the associated shelf-life limitation information for the product item, the electronic receipt being provided to a purchaser of the product item;

means for retrieving the shelf life limitation information from the electronic receipt; and

a processor coupled to the means for retrieving, the processor adding the retrieved shelf-life limitation information to an inventory list of products purchased by the purchaser, the processor further detecting an expired product based on the shelf-life limitation information, and removing the expired product from the inventory list.

36. (Previously Presented) The system of claim 35, wherein the first terminal is configured to store the shelf-life limitation information in an IC card accessible to the purchaser of the product item.

37. (Previously Presented) The system of claim 35, wherein the first terminal stores the shelf-life limitation information in a store server.

38. (Previously Presented) The system of claim 35, wherein the shelf-life limitation information includes a period for which the product remains viable.
